EDUCATION

IRON YARD | FRONT END ENGINEERING | GRADUATED MAY 2017

- **Shoe Store Project** – The project was completed by utilizing HTML and CSS to replicate the layout of a website based solely on the mockup provided.
- **Museum Project** – This project was a bit more involved, building upon a foundation of strong HTML and CSS, Responsive Web Design was incorporated in order to help this project shine regardless of the viewing device.
- **T-Shirt Project** – Focused on a fundamental aspect of UI development, this project required a solid understanding of CSS in order to make the menus react in a desirable manner.
- **PokeDex App** – A much more involved endeavor. An interactive PokeDex style application built with JavaScript and ReactJS. Styled with CSS utilizing SASS/SCSS. GitHub was integral in testing this project on devices with larger monitors.

SKILLS/TECHNOLOGIES

- | | |
|---------------------------------|---------------------|
| • Responsive Design | • Semantic HTML/CSS |
| • Collaborative Problem Solving | • JavaScript |
| • Creative Problem Solving | • ReactJS |
| • Grunt | • PHP |
